

Homeland Security Presidential Directive 12 Capabilities

SightComm serves federal, state, and local government customers nationwide. We provide exceptional technology, security, and business solutions to our government and commercial clients. Our capabilities include expertise in all areas of Identity, Credential, and Access Management (ICAM) Capabilities.

HSPD-12 SUPPORT AREAS

- ✓ FIPS 201-1 compliant issuance systems using a service provider (GSA MSO) or COTS products for internal issuance, including PIV-I and CIV cards
- ✓ Analysis and planning in conjunction with all stakeholder communities including IT, HR, Physical and Personnel Security for a strong supporting structure and compliance reporting framework
- ✓ Analysis of systems and design of solutions to meet HSPD-12 needs along with detailed migration plans and approaches
- ✓ Life-cycle implementation & management of HSPD-12 program including coordination with GSA MSO, NIST and OMB
- ✓ Materials prepared for a variety of media to educate and train user communities
- ✓ Design, installation and maintenance of HSPD-12 compliant PACS systems including establishment of an enterprise architecture eliminating stove-piped physical access controls
- ✓ Design and implementation of systems that enable card usage across the enterprise for application access
- ✓ Integration of all HSPD-12 systems including direct connection between HR, PerSec, and GSA MSO or other issuance systems for identity information and card status
- ✓ Full Help Desk support available at Levels I, II, and/or III
